

## The San Fernando Teaching Hospital Chancery Lane.

---

**The San Fernando Teaching Hospital - This 18-Level facility formerly earmarked for office and retail space, was retrofitted and converted into a state-of-the-art, ultra-modern teaching hospital, as a crucially needed extension to the San Fernando General Hospital. It was project managed by state-owned company, the Urban Development Corporation of Trinidad and Tobago Limited (UDeCOTT). The Hospital was built and retrofitted to 17 North American and British Codes and Standards, meeting and exceeding all requirements for an essential building, for continued operations after a seismic event.**

**Some of the modern medical features at the new San Fernando Teaching Hospital include:**

- Medical Vinyl which traps and kills bacteria, mold etc hence these cannot multiply/grow;
- Ceiling Tiles which absorb dust particles;
- Fixtures supported off the wall rather than being mounted from the ground, which will facilitate easy cleaning and access beneath the fixtures.

***The San Fernando Teaching Hospital has a total useable space of 368,725 square feet.***

**Lower Sections of the Building**

- Level 2 – University, Offices, Library & Public Access.
- Level 3 – Retail, Café, Discharge & Multi Faith Room.
- Level 4 - North – Children’s Outpatient, Mother & Child, Porter Services
- Level 5 – Functional Diagnostics, Doctors’ On Call Rooms.
- Level 6 – Adult Out-Patients.
- Level 7 – Car Parking, No Clinical Access.
- Level 8 – Administration.
- Level 3 to 7 South and Adjacent Car Park Expansion – 400 Parking spots now available.

**Main tower Section of the Building**

- Level 9 to 11 – Paediatric Wards.
- Level 12 to 17 – Adult Wards.

- **Level 18 – Administration.**

## **Construction of the Bed Lift/Elevator Tower and Bridge Link**

To ensure seamless and safe patient care, joining the two hospital facilities with proper access to all wards on the various levels, became a focal point of this very precise, technical and labour intensive driven project. It is with this focus that crucial construction of the Bridge Link, often called the Skywalk and the Bed Lift Tower commenced. The net result is that patients will benefit from very modern patient care and shared services across the two hospital facilities.

### **OUTPATIENTS' CLINICS**

Items	SPECIALITY	NAME OF CLINIC
1.	Maternal & Child Health (Antenatal)	<ul style="list-style-type: none"><li>· Gynaecology</li><li>· Antenatal</li></ul>
